

Sustainability Policy

Our Policy & Goals

Animate CIC will use our Sustainability Policy as a framework for the effective management and observation of the company's carbon footprint and energy usage; this demonstrates our long-term commitment to reduce our energy consumption and wastage in all our activities.

To ensure we regularly review our sustainability efforts, we have set three goals to be achieved over the next few years. Animate CIC will aim to achieve the following goals:

1. To minimise all energy consumption through efficient practices and encourage all company members to reduce their own personal consumption during company activities.
2. To strive towards a paperless practice to reduce wastage.
3. To discourage the use of single-use plastics such as water bottles and encourage reusable products as well as encourage recycling wherever possible to ensure what little wastage we produce is handled appropriately and sympathetically.

The implementation of our Sustainability Policy is the responsibility of Animate CIC's Executive Director, Ryan Wilce. Our environmental impact can be monitored under two categories: Energy Use and Wastage.

We will use environmentally safe and sustainable energy resources to meet our needs, and will invest in improved energy efficiency of the products we use.

We maintain that a primary part of environmental strategy is sustainable waste management and as such we recognise our responsibility to recycle materials wherever possible. We will minimise waste and whenever possible recycle materials. We will dispose of all waste through safe and responsible methods.
